550e Digital Label Press
Versatile High-Speed Color Label Printing System

The **NeuraLabel 550e Digital Label Press** uses single pass 4-color advanced laser technology to quickly print stunning full-color labels. Printing crisp images at 1200 dpi at speeds up to 55 feet per minute has never been so easy or economical.

Engineered specifically for label production, the 550e Label Press includes NeuraLabel's NoTouch™ Winding System and Continuous Feeder Attachment to create complete printed rolls.

Overview of the NeuraLabel 550e Digital Label Press
- Print on a variety of paper or synthetic media, up to 8.5" wide rolls
- Create any shape of label to fit your individual product need
- Integrates with graphical label creation software including Adobe products and BarTender, as well as common office software such as Microsoft Word or Windows Paint
- Creates complete printed rolls, ready for your finishing system

Uniquely Engineered for Label Printing
- Nearly 30 years of expertise engineering scanning, printing and winding systems
- NoTouch Winding System ensures easy media alignment and winding, without touching the printed page
- Patented Continuous Feeder Attachment (CFA) loads and cuts media rolls
- Small system footprint fits on your desktop
- Complete labeling solutions includes in-house label media testing, software expertise, and unparalleled worldwide technical support

Classical Label Printing Solution
- Print quality comparable to that found in high-end web presses
- Ultra-sharp color quality at maximum press speed
- PANTONE® calibration with onboard sample pages for color matching
- Spot color replacement for precision matching of critical colors
- Multiple printer drivers available to meet your specific standards

Eco-Friendly and Sustainable
- Toner cartridge recycling program available in more than 60 countries
- Energy-saving options to reduce power use and toner consumption
- Energy Star®, EPEAT®, and Blue Angel environmental certifications

Optional Finishing Equipment
Complete your printed labels with the compact **Virgo Digital Label Finisher** which laminates, digitally die cuts, slits, and rewinds to produce finished rolls ready for application.
