

SMART SOLUTIONS FOR THE LABELING INDUSTRY

MATRIX REMOVER & SLITTER

model **MCH100MTX25**

Specifics

- 100/240VAC - 5A $\overline{\sim}$ at 24V Power Supply
- 4 Blades Included
- 3" Fixed Core Holders
- Maximum Outside Roll Diameter 9.84"
- Maximum Label Width 8.66"
- Minimum Slitting Width 0.98"
- Manual speed Adjustment
- Label Rewinding Face-Out only

Dimensions

L: 32.28"; H: 23.62"; W: 18.50"

This machine can unwind, remove the label matrix from a die cut label roll, slit thanks to one or more cutter blades, and rewind onto a 3" motorized core holder rewinder.

The label matrix is the excess label material around each die cut shape, where ink or toner may settle after a full bleed printing process.

The machine can also be used to only remove the label matrix or only as a slitting system.

The matrix removal and slitting operations are performed simultaneously. It is a specific machine designed to handle die cut label rolls and ideal for all slitting needs.
